

Tikas is a corporate cantina management module included in the suite ***Alutel Mobility 6.0***.

Your employees can claim food tickets with the same access control cards they use to enter the job site.

Provide employee benefits, improve job site operations and control food consumption costs.

Tikas is compatible with recognized Access Control Systems via:

API & Third-Party Integrations

MAIN BENEFITS

Using Alutel Mobility's Tikas module with the RAGTAB will allow your company to:

Maintain a record of the employees who used your foodservice

Updated information 24/7.

Enforce safety rules related to corporate cafeterias

Ensure that your remote cafeterias operate under your corporate food safety regulations.

Control food expenses

Avoid extra expenses that can hurt your bottom line.

Optimize processes and productivity

No more manual processes. Let technology carry the heavy load for you.

Remote cafeterias are helping corporations in all types of industries provide perks their employees appreciate. With the Tikas module, your company will enter a new era of operational efficiency.
