

Aludoc is the document management solution included within the Enterprise Software Suite **Alutel Mobility 6.0**.

Aludoc makes real-time Access Control possible keeping user documentation up to date.

This solution allows you to automate your administrative processes and have a strict document control of the companies, people and vehicles that enter your physical facilities.

You can centralize documents, manage contractors, and simplify contracts, all with Alutel Mobility's Aludoc module.

Compatible with:

API & Third-Party Integrations

MAIN FEATURES:

Centralize your documents

Easily store your company documents people, vehicles, and even contracts.

Vehicle Management

Vehicle registration, consolidate documents and designate authorized drivers.

Employee Management

Register employee information, consolidate pictures, as well as related documentation required based on company guidelines.

Simplify your contracts

Contract definition, specify tasks and requirements, and automate employee-related documentation.

Anticipate document expirations

Be a step ahead of document expiration dates with email or web-based notification features.

User Permits

Create users clearly defining the actions they can carry-out, and the tools they can utilize to perform their duties.

ICapability of third-party integrations

If you use any type of Enterprise Software, please contact us for integration with Aludoc. We also develop basic APIs, in case you want to effortlessly carry-out the integration yourself.
